## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

The prior art documents submitted by Applicant(s) in the Information Disclosure Statement(s) filed on June 30, 2003 have all been considered and made of record (note the attached copy of form(s) PTO-1449).

### ***Specification***

The abstract of the disclosure is objected to because the abstract should be limited to a single paragraph. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Bhat et al (US 2001/0032985 A1).

Bhat et al discloses a multi-chip semiconductor LED assembly comprising (Fig. 6b):

Art Unit: 2874

a first electrode (20) formed on a top surface of the semiconductor laser, the top surface including a area above the active region (13); and a film (42) located at an area at least above the active region and applied on a portion of the first electrode.

As to claims 2 and 7, the film is made of an electrically highly insulative material.

See [0065].

As to claim 3, Bhat et al discloses a mounting plate (50), a second electrode (52) formed on the mounting plate, and a metal solder 41 connecting the first electrode and the second electrode.

As to claim 4, the film 42 is in contact with both the solder (41) and the semiconductor optical device. See Fig. 6b.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takeda et al, Yamamoto et al, Hironaka, and Kawai disclose different types of laser devices including a dielectric film.
